DETAILED ACTION

1. The indicated allowability of claims 1-25 in the Examiner's Amendment dated 6/28/04 is hereby withdrawn in view of the new rejection as follows.
2. It is noted that there is no written consent to the filing the reissue application signed by all of the assignees (see MPEP § 1410.01 and 37 CFR 1.172(a)).
3. The reissue oath/declaration filed with this application is defective because of the following: the statement of at least one reissuable error being corrected is not included and the specific deficiencies in the claim language of the patented claims that define the invention too narrowly must be identified (see 37 CFR 1.175 and MPEP § 1414).
4. It is noted that the oath or declaration must identify each inventor by full name, and country of citizenship as required by 35 U.S.C. 115 and 37 CFR 1.63(a)(3). Each inventor's residence and mailing address must also be provided, if they have not been supplied in the application data sheet (ADS)(see 37 CFR 1.76). Furthermore, when filed by the assignee, the required information must be present, even if it is asserted that it is based on the last available information known to assignee ("upon information and belief").
5. In addition, the oath or declaration must properly identify at least one 35 U.S.C. 251 error being relied upon as a basis for the reissue and that it is indeed an appropriate error for reissue (see 37 CFR 1.175(a)(1)). Also, specific changes or amendments to the claims must be identified. If new claims are presented, their differences from the original claims must be pointed out (see MPEP § 1414).

Art Unit: 3644

6. Furthermore, for any error corrected, which is not covered by an oath or declaration, i.e., any error corrected after the filing of all oaths and declarations currently in the reissue application, applicant must submit a supplemental oath or declaration prior to allowance stating "*Every error in the patent which was corrected in the present reissue application, and which is not covered by the prior oath(s) and/or declaration(s) submitted in this application, arose without any deceptive intention on the part of the applicant.*" (see 37 CFR 1.175(b)(1) and MPEP § 1414). Moreover, Applicant is notified that any subsequent amendment to the specification and/or claims must comply with 37 CFR 1.173(b). In addition, when any substantive amendment is filed in the reissue application, which amendment otherwise places the reissue application in condition for allowance, a supplemental oath/declaration will be required. See MPEP § 1414.01.

7. Claims 8-25 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to claim subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35

Art Unit: 3644

U.S.C. 251, and the broader scope of claim subject matter surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application. In this case, the reissue claims 8-25 do not include the claimed subject matter (i.e., a drive interconnected with each of the first, second, third, and fourth vertical adjustment members to adjust each at a equivalent rate and vertical spatial orientation such that a simultaneous four-point adjustment of the first and second planar members maintains the roller press in a parallel orientation with respect to the work surface) surrendered in the application for the patent upon which the present reissue is based.

8. Claims 1-25 are rejected as being based upon a defective reissue oath/declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

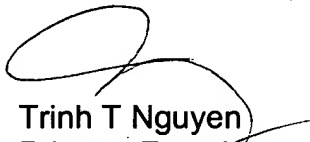

The nature of the defect(s) in the oath/declaration is set forth in the discussion above in this Office action.
